

Want your supply chain to be more efficient, but don't know where to start?

Start with Sunset. Through our **transportation management program**, we offer complete administration of all your logistics. Our team will streamline your logistics to increase **efficiency and savings**.

Full-Service for You

Planning and Design

We start by understanding your business and analyzing every piece of your logistics infrastructure. Then, we show you what's working and where we can customize solutions to bring savings and the level of service you expect.

- Understand your goals and current process
- Evaluate current logistics infrastructure for all modes

Solutions
customized
for you

Carrier Negotiation and Selection

Then, using our experience, relationships, buying power and proven proposal process, Sunset negotiates the best rates from your existing and/or new transportation providers.

- Easy to understand analysis of our findings
- Providers that maintain or improve your service levels
- Immediate cost savings and consistent service

Implementation

Based on your goals and requirements, Sunset guides your staff to achieve the best solutions for your company.

- Access to FreightLOGIK, our online transportation system
- Extend your team or outsource to our staff

Freight Audit and Payment

Increase efficiency and savings, including eliminating the expense of data storage while retaining invoice documentation.

- Cost reductions in invoice processing, audit, balance due reconciliation, and manual general ledger coding
- Comprehensive transportation database with research and reporting tools through Sunset's PayLOGIK system

Evaluation

Sunset's review process is ongoing, ensuring that you achieve the results you expect, with adjustments as needed.

- Detailed reports and information management
- Increased knowledge for your staff resulting in savings
